

The Digestive System Video Lesson Worksheet

Grade 5

Watch the video **The Digestive System**.

Answer the following questions while you are watching the video:

1. Which body system breaks down and handles food?
2. What is it made up of? (Hint: there are 10 parts)
3. What part of the digestive system uses stomach acids and enzymes to break down food?
4. Where does most digestion take place?
5. What does the liver do?
6. What happens in the large intestine?
7. Where does waste pass out of your body?
