ACKNOWLEDGEMENT

The Ministry of Education, Human Resource Development, Sports and Youth Affairs would like to thank all the teachers and their Principals and also the members of the communities of Grand Bay, Marigot, Wesley, Woodford Hill and Castle Bruce who participated in the development of this section of the Health and Family Life Education curriculum guide. Their thoughtful input and support provided great insight into issues of importance to children and youth of the country.

Special thanks go to Mrs. Lillian Alexander Williams – Teacher of the Grand Bay primary school, Mrs. Octavia Alfred – Principal of the Concord primary school, Mrs. Bernadine Augustine – Teacher of the Dos D’Ane primary school, Ms Gerrilyn Fabien – Teacher of the Isaiah Thomas secondary school and Ms Verna Graham – Teacher of the Goodwill secondary school who from the very onset of the development of the HFLE National Curriculum have been dedicated and committed to the process.

HEALTH AND FAMILY LIFE EDUCATION (HFLE)

HFLE is a powerful educational programme that provides children and young people with a positive view of HEALTH and its benefits to them NOW and in the FUTURE. It is essentially classroom education that seeks to empower children and young people with knowledge and skills for healthy living, preparing them to cope effectively with the many challenges of life.
ADDRESSING THE COMPLEXITY AND CONNECTEDNESS BETWEEN VARIOUS CONCEPTS, GOALS, COMPONENTS AND STANDARDS ASSOCIATED WITH ATTITUDE AND BEHAVIOUR CHANGE.

INTRODUCTION

This Health and Family Life Education (HFLE) curriculum guide is designed to enable all primary school teachers to empower students with the confidence they need to believe in themselves and to help them understand the importance of taking responsibility for their own health.

A very critical aim of this new curriculum guide is to help students achieve certain **Attainment Targets** as identified in the document. **Attainment targets are what students should know, should be able to do, and the desirable attitudes and values that they should display in each subject by the end of the compulsory years of schooling.** Additionally, the proposed programme embodies life-skills and other psychosocial competencies that our children and youth should develop as they grow into adulthood.

**Structure of the Guide**

The HFLE curriculum has been developed in keeping with the standards of the National Curriculum and the HFLE Regional Curriculum Framework. The content is guided by four broad principles or themes that form the bedrock of the HFLE programme. These themes are **Social, Emotional and Spiritual Well Being**, **Appropriate Eating and Fitness**, **Sexuality and Sexual Health**, and, **Managing the Environment**.

The content is so developed that for each unit at each grade level there are for main action areas:

- **a) Learning Outcomes** – Learning Outcomes are derived directly from the Attainment Targets and provide a measure of the learner’s achievement of the same. They indicate the depth and breadth of what learners should know, be able to do, and the desirable attitudes and values they should demonstrate at the end of each Key Stage
- **b) Success Criteria** – Success Criteria are derived directly from individual Learning Outcomes. They can be seen as stepping stones/ benchmarks to achieving the Learning Outcomes
- **c) Suggested Activities** – Suggested Activities are activities in which students may be involved in order to realise the Learning Outcome
- **d) Assessment Strategies** – Assessment Strategies are mechanisms to determine the extent to which the Learning Outcomes have been achieved.

A time frame has been recommended for the teaching of each Unit in terms of number of sessions/teaching periods. However, it is advised that teachers avoid focusing on curriculum coverage. Rather, we suggest that teachers provide opportunity for students to have meaningful interaction with the materials with a view to promoting in students positive behavioural and attitudinal change.

The guide also contains a sample unit plan, lessons and lesson plans for Grades 3 & 4; samples of a case study, checklist and rubric; a list of Life Skills and some useful tips for the teacher.
ATTAINMENT TARGETS

AT: 1 The learner will be able to demonstrate an appreciation of the diverse nature of people, to live and work effectively as an individual, a member of a family and a community with respect for gender equity, individual rights, responsibility and show reverence to a supreme creator.
(SOCIAL, EMOTIONAL AND SPIRITUAL WELL-BEING – STRAND 1)

AT: 2 The learner will be able to recognise and appreciate the benefits of appropriate dietary and fitness habits to promote healthy lifestyles for themselves, their families and the nation.
(APPROPRIATE EATING AND FITNESS – STRAND 2)

AT: 3 The learner will be able to develop a critical understanding of human sexuality, analyse the influence of socio-cultural and economic factors on the expression of sexuality and demonstrate the ability to make appropriate choices relating to their sexual well-being.
(SEXUALITY AND SEXUAL HEALTH – STRAND 3)

AT: 4 The learner will demonstrate the use of acquired life skills and positive attitudes in responding to challenges in the environment, make informed decisions using local, regional and global issues to ensure that the environment is sustained for use by present and future generations.
(MANAGING THE ENVIRONMENT – STRAND 4)

   ii Teacher to assess pupils using rubric for assessing collaborative work
**ALTERNATIVE ASSESSMENT TOOLS**

Alternative assessment strategies provide a non-traditional approach to assessing and interpreting student performance/achievement. Below are some examples of tools used for alternative assessment.

**Checklist**

A checklist is an instrument that can be used to record the level of participation of a student or group of students in an activity. It can also provide helpful feedback to the teacher about the attitudes, values and feelings of students. Every checklist requires a rating scale. This checklist which assesses the life skill **empathy** presents a rating scale from (1) Not at all; (2) Sometimes; (3) Often.

**Sample Checklist for assessing the life skill empathy**

Case Study

Case Studies are real-life stories that describe in detail what happened to a community, family, a school or an individual. When reading or handing out a case study to a class, it is important to help students recognize that a case study is not necessarily the way things ought to happen but is the way things did happen in a specific instance. Case studies may be used to help pupils clarify their own values. They also help teachers gain some insight into the values of their pupils.

Case Study – Moral Development

Joe is a 14-year-old boy who wanted to go to camp very much. His father promised him he could go if he saved up the money for it himself so Joe worked hard at his paper route and saved up the $40 it cost to go to camp and a little more besides. Just before camp was going to start, however, his father changed his mind. Some of his friends decided to go on a special fishing trip, and Joe’s father was short of the money it would cost. He told Joe to give him the money he had saved from the paper route. Joe didn’t want to give up going to camp, so he thought of refusing to give his father the money.

Questions for Story

1. Should Joe refuse to give his father the money? Why?

2. Does his father have the right to tell Joe to give him the money? Why?

3. Does giving the money have anything to do with being a good son? Why?

4. Which is worse: a father breaking a promise to his son or a son breaking his promise to his father? Why?

5. Why should a promise be kept?
